

STATE OF CALIFORNIA

CALIFORNIA INTEGRATED WASTE MANAGEMENT BOARD

Base Year Modification Request Certification

Part 1: Generation Study - No Extrapolation Diversion Data

To request a substitution for a previously approved base year used in calculating the diversion rate for your jurisdiction, please complete and sign this form and return it to your Office of Local Assistance (OLA) representative at the address below, along with any additional information requested by OLA staff. When all documentation has been received, your OLA representative will work with you to prepare for your appearance before the Board. If you have any questions about this process, please call (916) 341-6199 to be connected to your OLA representative.

Mail completed documents to:

California Integrated Waste Management Board
Office of Local Assistance
1001 I Street, (MS-25)
PO Box 4025
Sacramento, CA 95812-4025

General Instructions:

Please select the **ONE** choice below that best explains your request to the Board.

1. Use a recent generation-based study to calculate our current reporting year generation amount, but not officially change our existing Board-approved base year.

☒ 2. Use a recent generation-based study to officially change our existing Board-approved base year to a new base year.

The shaded cells on these sheets are protected. If you have problems using these sheets, please contact your Office of Local Assistance representative by calling (916) 341-6199.

Section I: Jurisdiction Information and Certification			
<i>All respondents must complete this section</i>			
I certify under penalty of perjury that the information in this document is true and correct to the best of my knowledge, and that I am authorized to make this certification on behalf of:			
Jurisdiction Name Lynwood		County Los Angeles	
Authorized Signature 		Title Director of Public Works	
Type/Print Name of Person Signing Joseph Y. Wang, P.E.		Date	Phone () Include Area Code (310) 603-0220ext 287
Person Completing This Form (please print or type) Oretha Williams		Title Recycling Coordinator	
Affiliation	City of Lynwood, Department of Public Works		
Mailing Address	City	State	ZIP Code
11330 Bullis Road	Lynwood	CA	90262
E-Mail Address owilliams@lynwood.ca.us			

Section II: Information for New Generation-Based Study for Existing or New Base Year			
Attach additional sheets if necessary—reference each response to the appropriate cell number (e.g., "4").			
<i>Note: New base years must be representative of a jurisdiction's disposal and diversion</i>			
1. Current Board-approved existing base year		2. Proposed new generation-based study year:	
1990		2000	
3. Explain how the proposed generation study year is representative of average annual jurisdiction disposal and diversion.			
<p>This new generation number reflects both the disposal and diversion activities in the year 2000. Since 1990, Lynwood has implemented and maintained numerous diversion practices and contracted with a franchised hauler to provide residential services. Disposal tonnage is obtained from the DRS and diversion tonnage was obtained through a detailed assessment of diversion activities within the City. No extrapolation was used; only actual weights were obtained or estimates identified based on Board or industry-recognized studies. There were no out of the ordinary activities which occurred during 2000, thus this new base year represents activities which regularly occur in an average year.</p> <p>Please note the original 1990 base year did not include "disposal" from inert facilities (Nu-Way and Calmar Reliance Pit). Because these inert facilities received Class III Solid Waste Facility Permits, by statutory definition their disposal was then included in DRS, with unintended consequences of adversely affecting Lynwood's Diversion Rate. In year 2000, Nu-Way's 6,721.5 tons and Calmar's 8,302.5 tons added a total of 15,024.0 tons of disposal to Lynwood. This accounts for 17% of the entire 88,509.13 disposal tonnage for year 2000.</p> <p>In addition, there may be significant DRS errors in regards to "self-haul" and misallocation issues. The exclusive franchise hauler shows approximately 47,683.16 tons disposed in year 2000 (from weight tickets). This leaves a total of 40,825.97 tons (or 46% of entire disposed waste stream) that is self-haul and/or DRS error. And lastly, the largest portion of construction on the regional Alameda Corridor project ran from 1998 through 2002 (under the joint-powers agency Alameda Corridor Transportation Authority). The contractor for this phase was based in Lynwood. Attempts are being made to determine the disposal resulting from this project, which had significant direct and indirect impacts on the Lynwood's disposal during this period. For additional information please refer to May 2002 Request for Disposal Tonnage Modification Certification. Therefore, the actual diversion rate for Lynwood is likely to be significantly higher than the currently calculated 14% figure.</p>			
4. Enter diversion rate information below.			
Diversion rate calculated using existing base year		a. -13 %	Diversion rate calculated using new generation-based study
For existing base year pounds/person/day based on generation		6.3942	b. 14 %
			8.0278
Residential generation 62 %	Non-Residential generation 38 %	Residential generation 27% %	Non-Residential generation 73% %
Population existing generation-based 61,945		Population new generation-based study 69,300	
5. If there is an increase from 4a to 4b, please explain how the new diversion rate is consistent with your current diversion implementation efforts. If the proposed new generation tonnage results in an increase in your pounds/person/day, please explain how this is consistent with your current diversion implementation efforts and provide any examples (e.g., change in jurisdiction's demographics).			
<p>This new diversion rate is the result of a detailed Waste Generation and Diversion Study. The study also reflects the numerous efforts Lynwood has taken to reach their diversion goals since 1990. These efforts include the implementation of several new diversion programs, educational outreach, a C&D ordinance and technical assistance programs. Lynwood contracted a franchised hauler to provide a curbside residential program, government recycling, and business technical assistance. The PARIS section of the Annual Report describes each of the programs implemented in the city. Lynwood is committed to pursuing continued increases in waste diversion by further improving and expanding programs and other diversion opportunities.</p> <p>Again, the shift in percentage of Residential to Non-Residential generation causes suspect in the disposal reporting for this jurisdiction, because Lynwood is primarily a residential community.</p>			
6. If the difference between the proposed diversion rates in 4a and 4b is greater than 5 percentage points, please explain the specific reasons for the difference. (For example: new/improved curbside diversion programs.)			

The negative diversion rate indicates that the base year was not accurate. Both generation and disposal was severely underestimated and the self haul was not quantified. Diversion estimates did not include waste reduction practices and internal business recycling. The default adjustment method does not accurately represent the impact of these and other diversion programs. The new base year study enabled the city to gain a clear understanding of the existing disposal and diversion activities. Lynwood has also implemented a significant number of diversion programs since 1990, and will continue to expand and improve existing programs.

7. Disposal Tonnage (enter values):	27361	60066	87427
	Residential	Non-Residential	Total

Please select the **ONE** choice below that best explains your **disposal** data and complete the required tables.

a. All tons claimed are from the Board's Disposal Reporting System (No explanation required. Go to Section 8.)

b. All tons claimed are from a 100 percent audit of hauler and self-haul tonnage. (Please complete Reporting Year Tonnage Request and Modification Certification sheet found at www.ciwmb.ca.gov/LGCentral/Forms/rytmdrq.doc)

☒ c. Some Disposal Reporting System data were corrected. (Please complete Reporting Year Tonnage Modification Request and Certification sheet found at www.ciwmb.ca.gov/LGCentral/Forms/rytmdrq.doc)

8. In the table below, list the summarized diversion activities, and diversion data records that support your claim and are available for Board audit. **Note: The Board expects the jurisdictions to be able to provide all back-up documentation, if requested. Include type of record and location—for example, weight tickets from transfer stations. This section should capture all diversion tonnage (form will perform all addition calculations). If any diversion is from restricted wastes, agricultural wastes, inert solids [e.g., concrete, asphalt, dirt,] white goods, and scrap metal, please identify those programs/waste types and fill out Section 10. Please mark as Attachment 8 all copies of survey forms.**

*Please provide detailed Non-Residential waste information in Section 9

Note: The Board has indicated that it will be scrutinizing total source reduction amounts greater than 5% of total generation. Please be prepared to provide additional details substantiating your claim.

Diversion Activity	Actual tons	Relative Percent to Total Generation	Specific Material Type(s) (List operation w/multiple materials in one box)	Specific Conversion Factor Used (if any) and Source	Type of Record and Location of Record

9. Specific Non-Residential Sector Waste Audits--Top 10 Non-Residential Generators

Please complete this table for the top 10 non-residential generators that were surveyed. List each non-residential generator separately from largest to smallest, based on total diversion tons. Audit reference number ties to your audit sheets.

(Table will perform all addition calculations).

Type of Non-Residential Generator	Audit Reference Number	Specific/Major Diversion Activities Include Material Type (e.g., paper recycling, glass recycling) (List activities on one line)	Source Reduction Tons	Recycling Tons	Composting Tons	Total Diversion Tons	Percent of Total Generation (Total Diversion Tons/Total Generation in Section 8)	Survey Method Phase (P) Mail (M) On-site (O) Other _____
(See Attachments)								
Totals								

Also provide an attachment 9 which includes all of the generators surveyed. Include for each generator (use type of generator in lieu of specific business name) diversion activity and material type and associated tonnage for each diversion activity/material type, and applicable conversion factors/sources. Include copies of survey form(s) used.

conversion factors and sources (e.g., cardboard recycling: quantified by monthly tonnage receipts provided by the contact person at the business).

10. For each restricted waste type (i.e., agricultural waste, inert solids, [e.g. concrete, asphalt, dirt, etc.] scrap metals and white goods [PRC section 41781.2]) and associated

a. If the diversion program started on or after January 1, 1990, complete the following table.

Note: program name refers to one specific diversion program for that waste type (e.g.,

Restricted Waste	Specific Program Name	Year	Tonnage
inert materials	Concrete & asphalt from City of Lynwood Public Work	2000	3165
scrap metals	water meter recycling	2000	3
pull down for waste			
pull down for waste			
pull down for waste			
pull down for waste			

b. If the diversion program started before January 1, 1990 - and if documentation on the program and waste type has not been approved by the Board - on a separate sheet marked "Attachment 10b", provide the documentation that indicates:

- How the diversion was the result of a local action taken by the jurisdiction, which specifically resulted in the diversion (PRC sec. 41781.2 [c] [1]).
- That the amount of that waste type diverted from the jurisdiction in 1990 was less than or equal to the amount of that waste type disposed at a permitted disposal facility by the jurisdiction in any year before 1990. (**Note:** this criterion is applicable to the entire jurisdiction, not to individual programs (PRC sec. 41781.2 [c] [2]). Please
- That the jurisdiction is implementing, and will continue to implement, the diversion programs in its source reduction and recycling element.

the Board, you do not have to provide an attachment 10b for that waste type and program.

Instead please provide date of Board approval of previously submitted "_____ e)

If documentation is not available, go to 10d.

c. If the diversion program started before January 1, 1990, and the documentation requested in 10b is available (but not yet approved by the Board), complete the table

Restricted Waste Type	Specific Program Name	New Base Year or Reporting Year Diversion Tonnage

requested in 10b is not available, please complete the table below for each program claimed. **Note:** Only the difference between the new base year/reporting year and 1990 can be counted in the diversion rate calculation.

Restricted Waste Type	Specific Program Name	New Base Year or Reporting	1990 Diversion Tonnage	Difference
